ImaarishaSRHR

PHASE 2 · ILLUSTRATOR BRIEF · ADDENDUM

Every asset, on one sheet

A single, quotable production list for the five-film kinetic & cinemagraph slate: every character pose, plate, motion loop, icon and reusable template — with the films that use each. Draw the one-time set once; each film is then assembly, not origination.

Community Media Trust (CoMeT) · July 2026

imaarishasrhr.org · #ImaarishaSRHR

For the illustrator and the motion designer: this is the whole shopping list. Quote the one-time build, then the per-film assembly separately.

HOW TO USE THIS SHEET

One build, five films

Because all five films share a cast, a plate style, a type system and an end-card, the assets below are drawn once and reused across the slate. Everything is grouped by what it is and tagged with the films (V1–V5) that use it, so a quote can separate the one-time origination from the light per-film assembly. Keep every pose faithful to the character bible — same faces, clothing and colour — because recognition across films is the mechanism, not a nicety.[1]

~22	~10	~9
character poses across the whole cast (many shared between films)	plates / backgrounds	cinemagraph & motion loops, reused everywhere

The films: V1 Demystifying SRHR · V2 SRHR & Disinformation · V3 Myths & Facts · V4 Latest Developments · V5 Where to Get Information.

1 · CHARACTER POSES

Character poses (transparent PNG)

One or two poses per character per beat, drawn from the character bible. Where a character recurs (Wanjiru, Kevo, Beth), the same poses serve multiple films. [1]

Character	Poses needed	Films
Aunty Beth	Stirring at the sufuria (warm); kind inset that resolves to a slow nod.	V1, V3
Mama Grace	Feeding one child while another studies (calm, capable); warm at the table (blink).	V1
Agneta	Asking a question at the table (open, unafraid).	V1
Young couple (cousins)	Two figures, heads together over one phone (planning).	V1
Baba Tom	On a bench with a CHP, relaxed, mid-nod.	V1
Nurse Wanjiru	To-camera, warm and open (steady blink + breath) — the trust anchor.	V2, V3, V4
Uncle Silas	Lit by a phone: anxious version, then calm/settled version.	V2
Kevo	Shrug (V1); host set — phone in hand, gesturing, reassuring (3 poses, V5).	V1, V5
Brenda	To-camera, quiet strength (single slow blink).	V4
CHP figure(s)	One neutral community-health-promoter figure; small ring/cluster for data beats.	V4, V5
Hero face	One calm Achieng face, direct to camera, for the closing reframe.	V1

Note. For the “blink” cinemagraph, each to-camera pose needs a matching eyes-closed variant (Wanjiru, Brenda, hero face, Grace). Cheap to draw alongside the open-eye pose; essential for the alive-and-listening effect.

2 · PLATES & BACKGROUNDS

Plates & backgrounds

Plate	Description	Films
Dawn compound kitchen	Warm golden-light interior; the sufuria; a curtain that can drift.	V1
Table interior	A calm home table for the mother–daughter and asking beats.	V1
Bench exterior	An outdoor bench with foreground foliage (leaves to drift).	V1
Flat brand-colour field	Solid ImaarishaSRHR colour for type-forward beats.	V1–V5
Dark network field	A deep field for multiplying phone screens / the message spreading.	V2
Warm clinic corner	A friendly clinic-corner behind Nurse Wanjiru (never clinical/cold).	V2, V3
Clean caption field	Minimal field for Pause·Check·Ask, Myth/Fact and the 3-question card.	V2, V3, V5
Faint Kenya map	A soft, low-contrast national map for the data film.	V4
Doorstep	A home doorstep for the CHP / reach beats.	V4, V5
Warm community field	A general warm community backdrop for the faith-and-reach beat.	V4

3 · CINEMAGRAPH & MOTION LOOPS

Cinemagraph & motion loops (motion designer)

Built once as masked loops or simple transforms and reused across the slate. One moving element per shot — never more. [1]

Loop	How it's made	Films
Sufuria / ugali steam	A looping smoke element masked over a still pot.	V1
Curtain / cloth / hair drift	Soft wind displacement on one masked region.	V1
Foreground leaves	A few leaves drifting past in the foreground plane.	V1
Blink / breath	Open/closed eye poses cross-faded (4–6s); chest +2px.	V1–V4
Phone / screen glow	A pulsing light layer under a face; blue (fear) and gold (truth) variants.	V1, V2, V5
Parallax push-in	Foreground/background drift 3–5px, or a 4% slow zoom.	V1–V5
Replicating screen field	Phone screens multiplying outward from one point (blue → gold).	V2
Count-up counter	A number racing upward and settling on the figure.	V2, V4
Myth → Fact colour wipe	A warm wipe replacing grey "myth" with warm "fact".	V3

4 · ICONS & GRAPHIC DEVICES

Icons & graphic devices

Device	Use	Films
“FALSE” stamp	The single bold-colour stamp across the false claim.	V2
Pause · Check · Ask icons	One small icon beside each of the three reflex words.	V2
Method-swap icon	Beside the “switch method” fact.	V3
Hands-meeting motif	Beside the “decide together” fact.	V3
Clinic icon	Source 1 — a health worker / clinic.	V5
Verified-badge icon	Source 2 — verified professionals online.	V5
Doorstep / CHP icon	Source 3 — ImaarishaSRHR & the CHP.	V4, V5
Lock (privacy) icon	The “services are private” reassurance.	V5
On-paper / in-practice columns	The two-column tension device.	V4

Reusable templates (build once)

These are the type-and-motion systems the whole slate shares. Design once; every film drops content into them. [1]

Template	What it is	Also becomes
Kinetic-caption system	Brand type with one accent weight for the key word; standard wipe/weight-shift ins.	The look of every film.
Myth / Fact unit	Grey myth → warm-wipe fact pair.	A standalone 30s cutdown for the Mother & Aunty channel.
Count-up number system	The animated big-figure style (100,000+, 675,000, 16.8m).	Reusable across data posts.
The 3-question card	Who’s saying it? · Are they qualified? · Do trusted sources agree?	A standalone post and a printed job-aid.
The end-card	Logo mark, handle, tagline — identical on all five.	The recognition button across the toolkit.

FOR THE QUOTE

How to price it

ENTRY POINTS FOR YOUR ORGANISATION • **Two line items, not five films**

→ **One-time origination.** The ~22 poses (with blink variants), ~10 plates, ~9 motion loops, the icon set, and the five reusable templates. This is the bulk of the cost — and it is paid once for the whole slate.

→ **Per-film assembly.** For each of the five films: drop stills and plates onto the templates, time captions to the VO, add the one motion per beat, master 9:16 and export 1:1 / 16:9, then record EN / Kiswahili / Sheng VO over the finished picture. Light and repeatable.

Why this is the efficient buy. A live-action or full-animation slate pays to originate every shot. Here the origination is a finite, shared library; the films are assembly on top of it — and every asset also feeds the wider toolkit (job-aids, posts, the Field Guide), so nothing is single-use.[1]

Respectfully. Relentlessly. Together.
